课程简介 (200 字左右)		<p style="text-align: center;">This course is about financial decisions made by corporations. Broadly speaking, every decision that a corporation makes has financial implications, and any decision which affects the finances of a corporation is a corporate finance decision. This course provides an introduction to the theory, the methods, and the concerns of corporate finance. Main topics include (1) present value techniques; (2) capital budgeting principles; (3) asset valuation; (4) trade-off between risk and return; (5) market efficiency; (6) corporate financing and dividend policy.</p>
